

C1 physical indicia on said syringe related to the capacity of said syringe.

C2 Sub DI 24. (Twice amended) A syringe, comprising:
a body having a closed forward end having a nozzle and an open rearward end,
a plunger located within said body, and
physical indicia on said syringe related to the distance of the plunger from an end of said syringe when said syringe is initially installed on said injector.

C3 SS F37 26. (Twice amended) A pre-filled syringe, comprising
a body having a closed forward end having a nozzle and an open rearward end,
a plunger located within said body, and
physical indicia on said syringe related to the amount of fluid in the pre-filled syringe.

C4 SS F47 28. (Twice amended) A syringe, comprising
a body having a closed forward end having a nozzle and an open rearward end,
a plunger located within said body, and

C4 physical indicia on said syringe related to the end of travel position of an injector ram coupled to the plunger when the syringe is coupled to an injector.

C5 5-8 157 30. (Twice amended) A syringe, comprising a body having a closed forward end having a nozzle and an open rearward end, a plunger located within said body, and physical indicia on said syringe related to the range of travel of an injector ram coupled to the plunger when the syringe is coupled to an injector.
